

Oklahoma is Energy! Despite the recent economic downturn that has resulted in epic budget cuts, FIRST Robotics Competition (FRC) TEAM 932 intends to keep the energy flowing. We are committed to growing FIRST in Oklahoma. We want to help every team in Oklahoma fund their 2016 season.

Through FRC TEAM 932's "Flashlights for FIRST" fundraiser, your team can earn the money to fund your 2016-2017 season. Each registered Oklahoma FIRST team is eligible to receive FREE Flashlights, at no cost to you, to sell in your community for \$5 each. With hundreds of dollars raised, your FIRST team can pay registration fees, buy new robot components for your team, or help fund new FIRST teams that are just getting started.

A fundraiser can be a great team building activity. In just a few afternoons, your FIRST team can experience the satisfaction that comes from paying their own way. Combine your fundraiser with a robot demonstration to build presentation skills and prepare for the upcoming competition.

These flashlights are battery-free and great to include in an emergency kit at home or in a car. The flashlights use Faraday's Law Shaker Light Technology and simply require shaking for 90 seconds to supply the energy to a bright LED bulb.

Registered FIRST teams should contact FRC TEAM 932 at FRCteam932@gmail.com with proof of registration. We will work with teams for centralized distribution locations, dates, and times for teams to pick up the flashlights.

- Each FLL-Jr team is eligible for 25 flashlights*
- Each FLL team is eligible for 75 flashlights*
- Each FTC team is eligible for 75 flashlights*
- Each FRC team is eligible for 100 flashlights*

Oklahoma is Energy! Through the Flashlights for FIRST Fundraiser, the future is about to get a lot brighter.

Together we can Shine a Light on FIRST! Sincerely, FIRST Robotics Competition TEAM 932, The Circuit Chargers.
